

Treetops Stage 10
Dexter's Dinosaurs

1. What evidence does the author give us to show how Dexter was dinosaur mad?

2. How did the dinosaurs appear in the town?

3. What was wrong with the spell?

4. Why couldn't the tyrannosaurus climb out of the hole?

5. How did the wizard make the dinosaurs disappear?

6. Why didn't Dexter get into trouble for all the dinosaurs' damage?

7. Why wasn't Dexter listening to the wizard at the end of the story?

8. If you knew a wizard, what would you wish for on your birthday?

Treetops Stage 10

Dexter's Dinosaurs

1. What evidence does the author give us to show how Dexter was dinosaur mad?

Everything in Dexter's bedroom was dinosaur themed. He also had a dinosaur birthday party.

2. How did the dinosaurs appear in the town?

The wizard thought up a spell for Dexter's birthday.

3. What was wrong with the spell?

Instead of one dinosaur the wizard asked for too many.

4. Why couldn't the tyrannosaurus climb out of the hole?

It had silly little arms, so it couldn't pull itself out.

5. How did the wizard make the dinosaurs disappear?

He said the spell backwards.

6. Why didn't Dexter get into trouble for all the dinosaurs' damage?

The grown-ups said, "Well done! The way you grabbed hold of those monsters and told them they had to go! You've saved us!"

7. Why wasn't Dexter listening to the wizard at the end of the story?

He was too busy thinking, "What can I ask for next birthday?"

8. If you knew a wizard, what would you wish for on your birthday?

Open.
