

Ideas to help with research into the effect of weather on tourism and the effect of tourism itself in your area of study.

1. Use the brochures to show how weather conditions (as you can see them in the pictures) affect the tourism in an area:

- ◆ What sort of tourism is there?
- ◆ How does the weather affect this tourism?
- ◆ Is the place suited to more than one kind of tourism/holiday? (Could you go there for a holiday in winter and summer, if so how would the holidays be different?)

2. Look at the pictures again, any books that you have and your own knowledge:

- ◆ What are the good effects of tourism? (e.g. it creates jobs)
- ◆ What are the bad effects of tourism? (e.g. litter)

Present the findings of your research as the final part of your information fact file on the mountainous area that you are studying.
