

Multiples of five.

LO: to be able to double any multiple of five, up to one hundred.

Task 1:

Cross out all the numbers which are **not** multiples of 5.

21	40	70	15	80	50
90	95	100	45	35	98
10	56	5	25	43	49
87	55	93	17	21	75
85	20	30	99	23	40
60	18	47	65	33	76

Task 2:

Choose 15 of the numbers you have got left. In your books, work out what double of each number would be. Set out your work like this:

1. Double 10 = 20

Task 3.

Look carefully at your answers. You should see a **pattern**. **Describe** the pattern you have found, and **explain** why it happened.
