# Temperature Graph

This is a graph which shows the highest temperature that was recorded each day for a week.

1. Which day had the highest temperature?

2. What was the temperature on Saturday?

3. How much higher was the highest temperature recorded on Saturday than the temperature recorded on Monday?

4. Discuss any patterns that you can see shown in the graph for the temperature over the week.

5. The people who made this graph took the temperature several times a day. Can you tell, from the graph, on which day they recorded the lowest temperature? Give reasons for your answer.

6. How could the people taking the survey have improved their graph to give a better idea of the temperature over the whole week?
