

Earth, Sun and Moon.

Is the earth flat?

Is the sun bigger than the moon?

Does the sun move?

Draw how the earth, sun and moon would look in space. Concentrate on the positioning, size and what the surface would look like.

Does the moon give out light?

Describe how the position of the sun appears to change over a day.

Which month has the most hours of daylight?

Which month has the least hours of daylight?

What is a year?

Is it day all over the world at the same time? Explain.

Write a paragraph of at least 50 words explaining what you have learnt about the earth, sun and moon.
