

1. Light is all around us.
Make a list of where you know it comes from. We call these **sources** of light.

Name _____

2. An experiment to show light travels in straight lines

Draw a picture to show how we might prove light travels in straight lines.

1. Sources and straight lines

3. Making light turn round a corner!

We can use a _____
to make light travel around a
corner.

We say the light is
_____.

We see ourselves in a
_____ because the
light bounces back in a straight
line.
